Notice No. CHD-2026-4471

Date of Issue: 10 September 2026

Nadia Ferris

Owner/Operator

Marigold Bistro, 214 Elm Street

RE: Temporary Closure — Notice of Violation and Corrective Action Requirement

Dear Ms. Ferris,

Following an on-site inspection conducted 9 September 2026 in response to a self-reported cluster of customer illness complaints, this Department has identified a critical violation of time/temperature control requirements for a ready-to-eat condiment product (aioli-based spread) in use at the above-referenced establishment.

Laboratory analysis of samples collected on-site is consistent with bacterial growth attributable to extended holding of the opened product at ambient temperature beyond the four-hour limit required under Food Code §3-501.19. This Department's records do not indicate a permit amendment or supplier-change notification on file for the product substitution that occurred on or about 4 September 2026.

Effective immediately, Marigold Bistro is subject to the following:

1. Temporary closure of food service operations until re-inspection confirms corrective action.
2. Submission of a written corrective action report detailing root cause and remediation steps, to be received by this office within five (5) business days of this notice.
3. Disposal of all remaining affected product under Department observation or documented self-certification.
4. Staff retraining on time/temperature control procedures, to be documented and available for review at re-inspection.
5. Re-inspection will be scheduled upon receipt and review of the corrective action report; closure remains in effect until re-inspection is passed.

Please direct questions regarding this notice or the re-inspection process to this office.

Sincerely,

Dana Okafor

Senior Inspector, Division of Food Safety & Sanitation
City Health Department
